Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1,3-9,11,13-20,22 and 24-28 are allowable over the prior art. The closest prior art is Chum (US 5,677,383) in view of Bamberger (US 6,384,158). Appellant concedes that Chum's blend corresponds to mixture (A) of claim 1. The blend comprises a homogeneously branched substantially linear ethylene/alpha olefin interpolymer and at least one heterogeneously branched ethylene polymer (abstract). The linear ethylene alpha olefin interpolymer does not have long chain branching (col 4, lines 8+) and may comprise linear LDPE or linear HDPE made using uniform branching distribution polymerization processes. The heterogeneously branched ethylene polymer may comprise Ziegler polymerized linear LDPE (col 7, lines 66+). Bamberger teaches LDPE may be added to linear polyethylenes in order to improve their melt strength (see Background of the Invention).

The Board concludes the Office has not established that a person of ordinary skill in the art would have regarded Chum's polymer blend of homogeneously branched substantially linear ethylene/alpha olefin interpolymer (e.g., linear LDPE or linear HDPE) and at least one heterogeneously branched ethylene polymer (e.g., Zeigler polymerized linear LDPE) to be linear polyethylene of the type that may be improved by adding low amounts of low density polyethylene in accordance with the prior art process discussed in Bamberger.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
